

# SUSTAINABILITY REPORT 2025

## RENATA HOTEL

Renata Suites Boutique Hotel is located in the city center and is just a 4-minute Metro ride from Taksim Square. The hotel is within walking distance of the Lütfi Kırdar International Congress and Exhibition Center, and only a 3-minute Metro ride from Istanbul's and the region's largest shopping malls.

Conveniently situated near Osmanbey Metro Station, the hotel is 23 km from Istanbul Atatürk Airport.

A new breath, a new place, new tastes, new feelings—home comfort combined with office ergonomics... Renata Suites Boutique Hotel invites you to experience Istanbul from a different perspective.

İlkay ŞEREMETLİ  
General Manager

The years 2023 and 2024 marked a period when sustainability in tourism became too important to postpone. As Renata Suites Boutique Hotel, we saw this period as an opportunity to improve ourselves and to become a business that is more mindful of the environment and society.

We implemented many practices to use resources more efficiently, reduce our carbon footprint, and take steps aligned with the principles of the circular economy. From energy and water savings to effective waste management, from stronger collaborations with local suppliers to creating a more inclusive working environment for our employees, we achieved significant progress in many areas.

Over these two years, we realized that sustainability is not only about the environment; it is also a way to offer a better experience to our guests, provide a stronger future for our employees, and contribute positively to our community.

As Renata Suites, we believe that the steps we have taken during the 2023–2024 period are leading us toward a greener, fairer, and more resilient future. And we are committed to continuing this journey together with all our stakeholders.

# ABOUT THE REPORT

As Renata Hotel, we are committed to publishing meaningful and timely information each year regarding our environmental, social, and governance performance, as well as our management approaches, by focusing on the environmental and social issues that are most important to our services.

We aim to make greater use of technology by preparing our Sustainability Report in a digital format, allowing us to communicate more effectively with our stakeholders and helping to reduce our carbon footprint.

## Scope of the Sustainability

Report The scope of the core performance data in this report includes Renata Hotel's 2024 data. It will also include previous years for comparison purposes as data becomes available.

1 Fitness Area

# ENERGY

**446.100 kWh**

**ELECTRICITY**

We aim for continuous improvement in energy efficiency. Our energy consumption is monitored and reviewed on a daily, monthly, and annual basis.

Key energy consumption points are identified each year.

In addition to our efforts to enhance energy efficiency, we are conducting feasibility studies on the use of renewable energy to help reduce our carbon footprint, in line with the Sustainable Development Goals and the European Green Deal compliance process.

# ENERGY

**17.020 m<sup>3</sup>**

**NATURAL OIL**

Renata Suites olarak doğalgaz tüketimimizi düzenli şekilde takip ediyor, ısıtma ve sıcak su sistemlerimizi enerji verimli cihazlarla güçlendiriyoruz. İzolasyon iyileştirmeleri ve otomasyon sistemleriyle gereksiz tüketimi azaltarak hem çevresel etkimizi düşürüyor hem de enerji tasarrufu sağlıyoruz.

Ayrıca, doğalgaz kullanımını uzun vadede azaltmak için yenilenebilir enerjiye geçiş çalışmalarımızı sürdürüyoruz.

# WATER

**6.042 m<sup>3</sup>**

Projects are being developed and implemented to reduce water consumption, and water consumption values are regularly monitored on a monthly basis. Water leakage controls are continuously conducted, and immediate intervention is ensured.

For a sustainable environment, the discharged water is in compliance with both the discharge limits set by the Water Pollution Control Regulation and international regulations and standards, and is released into the receiving environment with the required water quality.

Our hotel is located in an area that requires measuring all water-related risks by gathering all indicators selected from the categories of Physical Quantity, Quality, Regulatory, and Reputation Risks.
